**Expand your living space
and enhance the
enjoyment of your home.**

A comprehensive re-engineering and re-design of "Perma" retractable awnings by Hunter Douglas, Scandinavia and Turnils Canada.

Featuring Dyneema® tape elbows and shoulders. Providing a sleek Swedish design with superior strength and durability.

A streamlined approach to design that utilizes the same components throughout the model range.

From a small balcony to a restaurant terrace, the NEW F.A. SERIES of awnings will satisfy your shade requirements.

COMMON FEATURES

- Manual or Motorized • Optional Hood Cover • White RAL 9010 • En#13561 Certified • Powder Coated In Sweden

The designer end bracket connects the square shape of the back bar with the round shape of the roller tube in a fluid way.

Available in F.A. 46, 44, 24.

The unique fully enclosed aluminum mounting brackets are attractive and fully adjustable accommodating for any installation style.

Available in F.A. 46, 44, 24.

The front bar and arms are extruded aluminum with die cast elbow joints and stainless steel fasteners. Each arm features 2 heavy duty springs for optimal fabric tension.

Available in F.A. 46, 44, 24.

An optional vario pitch control provides maximum shading comfort. By rotating the eyelet of the gear, the projection angle can be adjusted up to 40%.

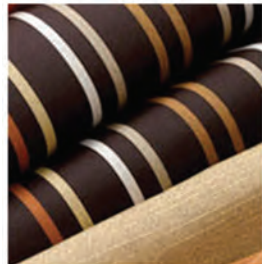

Available in F.A. 46, 44.
