KRAHN

KRAHN is a Canadian company;
designer and manufacturer
of
premium quality,
all-season outdoor,
recycled poly,
casual furniture.

Built for ultimate relaxation and entertainment
at home, and away from home; for
patios, bistros and cottages
around Canada and the World.

The KRAFIN team says **thank-you** for supporting Canadian business.

Conveniently located in the Great Lakes region of Southern Ontario, we have been designing and building our very own patio furniture since 1986.

All of our products are engineered and built with comfort, quality, and beauty first and foremost.

We are a family based company that caters to our dealers and customers above anything else.

We currently do not sell retail, but have a network of dealers primarily throughout Ontario that you may visit and purchase from.

Chair Accessories

Refined Comfort

It's our passion, and your first impression. Feel it in the oversized back and wide seat, with support and curves that feel just right, and generously wide arms for all the personal space you desire.

Premium Quality

We have extremely high quality standards and put a lot of effort into the details. You'll see, and most definitely feel the difference from the moment you sit down.

Customizable Style

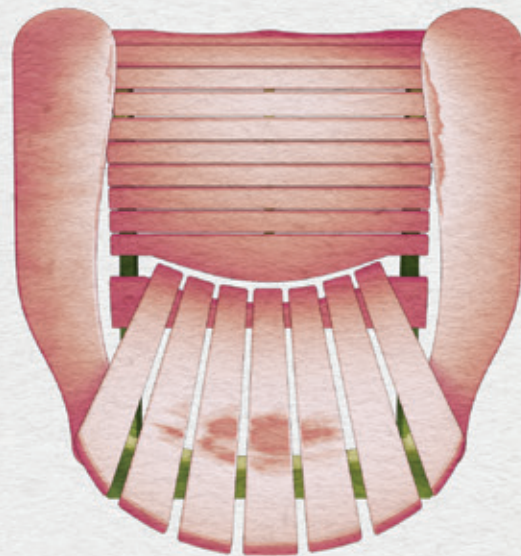

Classic and timeless designs make it easy to match or improve any space, and never go out of style! With add-ons and an ever-growing range of colours and textures, you have seemingly endless possibilities.

Recycled

This is a big one. Made with premium grade, recycled, high-density polyethylene. With each product, we advance our efforts to help end plastic pollution.

Hidden Hardware

Marine-grade stainless steel hardware remains mostly hidden, thanks to our innovative designs, for an easy-to-clean, comfortable, and classy style.

Famously Comfortable Adirondack Chairs

"You had me at..."

Maintenance-Free

A chair that takes care of you, not the other way around. No special care required.

Weather-Resistant

High-density recycled poly and stainless hardware make this a weather-resistant, all-season outdoor product.

Long-Lasting

With added strengths such as additional supports, heavy-duty legs, and premium grade ingredients; our products are built to stand the test of time, and are backed by a 10 year warranty for that peace of mind.

Not familiar with Poly?

SUSTAINABLY RECYCLED

HDPE, or High-Density Polyethylene, is made from purified blends of recycled plastics; the kind that come from recyclable containers such as milk jugs and detergent bottles which are otherwise destined for our oceans and landfills.

EXTREMELY DURABLE

Our premium grade high-density poly offers extreme resistance to worldly elements and every day wear-and-tear.

ALL SEASON WEATHER-RESISTANT

With exceptional resistance to moisture, poly will not rot, splinter or crack. Impervious to many other hazards of environmental exposure such as ice, salt, insects, stains, and corrosive substances; this product was designed to stay outdoors all seasons.

VIRTUALLY MAINTENANCE-FREE

This wonderful material requires no water-proofing, staining, or any other similar type of recurring maintenance.

Here are the pros...

APPEALING TEXTURES AND COLOURS

Polyethylene is pleasing to the eye and smooth to the touch. Available in an ever-growing catalogue of colours and textures that look good, and make you feel good.

EXCEPTIONALLY FADE RESISTANT

Recycled polyethylene extrusion has advanced considerably since early-gen technologies, resulting in a material that is becoming increasingly fade resistant. With built-in UV protection, most products see little-to-no fade over the service life of the product.

The Adirondack Chair needs no introduction around here. Here's a quick one anyway...

Famous for its relaxing pull-you-in-and-hold-you-comfort, and timeless, signature fanback style; the Adirondack Chair quickly became a favorite for the outdoorsy type.

Its worldwide journey to epic popularity started around its homeland of the Adirondack mountains in America, inspiring the name and design over 100 years ago, and quickly fanned out, pun intended, into Canada's Muskoka, near the Great Lakes home of KRAHN, where today, variations of this chair are often called a Muskoka chair.

Most forms of this chair sport the same defining characteristics; large, concaved fanbacks, reclined seats, and wide arms.

Everything about these unique lounge chairs shows how much value we northerners put into our short summers and time together in the great outdoors.

Our versions of this classic aim to be the ultimate in comfort and style, complimenting your space at home and at the cottage; built heavy duty, offering superior strength and durability.

The Adirondack Patio Chair is so easy to get in and out of.

Although the original Adirondack Chair's famous reclined position is comfortable, it can become too much to ask, getting in and out every day; it really wants you to stay.

Sporting the same contoured backs and triple-supported seats from the original Adirondack Chairs, the Adirondack Patio Chairs are simply more upright in angle for your convenience.

You get all the wonderful feelings you get when you sit in an Adirondack Chair, without the feeling of lacking the athleticism required to use them.

The rockers and gliders are identical to the chair and are available in single seat configurations.

These chairs are about taking care of YOU. Find the one that feels right!

 Arm Height 24"
 60 lb.

True Body Thickness .75"
 Aluminium Reinforced

Our Muskoka Chair isn't unlike the Adirondack Chair in terms of relaxed comfort.

The Muskoka Deck Chair swaps back legs for a more traditional back frame, and sits very slightly higher and more upright. The concave of this back stays vertically straight.

The Muskoka Deck Chair is perfect for those seeking a smaller footprint and lighter chair; one that sits somewhere between the Adirondack Chair, and the Adirondack Patio Chairs.

Our Muskoka Chairs also come in a Dining and Bistro format. These can absolutely be purchased alone, but are also designed to fit our table sets; creating a fine balance between dining and relaxing.

The Bistro Chair is ideal for unwinding or entertaining. This unique chair is increasingly popular thanks to its blend of style and ergonomic comfort, and for its convenient stay-in-the-action counter height.

Whether it's just you, or you need room for the whole family...or maybe you realize the party is always at your place; we offer tables that fit up to 8 chairs, and are ready for any occasion.

Tables for Bistro and Dining are identical, aside from the height.

Table end designs are standard as shown. Choose additional premium options such as end design, or the umbrella hole system, which includes base support and tighteners.

Need help deciding?

Our Bistro tables are popular, and are a smart choice for just about any space, from deck to poolside to the cottage. With ultra-convenient height and I-don't-want-to-leave comfort, you can't go wrong.

The Deluxe tables are a common choice when the focus is more on the traditional dining space than the relaxing or entertaining.

Product Care & Maintenance

Although our products are extremely weather-resistant and virtually maintenance-free, there are some easy and tried solutions for cleaning and caring for your chairs to keep them looking like new.

Poly is smooth to the touch, making it easy and basically self-cleaning. It does not absorb moisture; therefore, it will not stain. It is safe to leave out all seasons; spring, summer, autumn, and winter. It's also fairly heavy, so it's safe in the wind and storms. Snow and ice will not affect it.

The sun is your worst enemy, and that's especially true for your chairs. Everything will fade eventually, even if only slightly. Our poly uses high colour-fast UV protection systems to keep your chairs vibrancy for years, even decades, and has come a long way since early gen technologies.

UV Covers and waxes can help preserve the shine and colour life of your chair. Keep an eye on our products list or ask your local dealer to see available covers, or find them everywhere online.

When it comes to cleaning, soap and water will do the trick most of the time, wiping away stains and messes easily. Try this first.

Pressure washers will help remove dirt and grime that may have built up over the years or over winter. Don't get too close; it doesn't take much pressure to get your chair looking like new. Too much pressure, or scrubbing with too hard of a brush may cause the material to start getting fuzzy and rough.

Strong cleaners and solvents, such as bleach/water mixture or chlorine, are safe and can also help remove supposed stains. Check your local hardware store for outdoor plastic furniture cleaners. Currently, we do not offer a line of cleaning products.

A note on insect repellent.

Yellow, and dead plant colours, can, in certain areas worse than others, attract flying insects.

We recommend using a natural repellent such as neem, which you can search for online, or inquire about at your local garden center.
